

More plastic means less marine life.

Plastic threatens many marine species. To understand the seriousness and urgency of the issue, just look at the numbers.

100 Million

marine animals die each year from plastic waste alone.

1 in 3

marine mammal species get found entangled in litter.

100,000

marine animals die from getting entangled in plastic yearly.

It's time to take action!

There are so many ways you can reduce your plastic footprint. For some great tips, head to www.reallygreatsite.com.
